1 minute contact time for viruses & bacteria
* 5 minutes contact time
+ 10 minutes contact time

## Use Instructions:

1. Pull towelette from the canister dispenser
2. Wipe the surface

1. All surfaces must remain visibly wet for 1 minute to have a virucidal and bactericidal effect
2. Allow to air dry
3. Dispose wipe after use
4. Do not flush in a toilet

1. Ideal for keyboards, telephones, patient areas and high-touch surfaces
2. If disinfecting food contact surfaces, rinse with water.

## Supplies/Tools:
- Gloves should be considered, as prolonged hand contact will dry skin

## Safety:
- Oxivir Tb has a low concentration of active (AHP)

## Control Points:
- Do not mix with other detergents or other chemicals
- Not for use on glasses, dishes and utensils or therapeutic devices.
- Not recommended for use on brass, copper or marble
- Safe on carpets and fabrics
- Safe on stainless steel
- Biodegrades to OXYGEN and WATER
