

VIP – Automotive Services

Grades 9 - 12

Vocationally Individually Paced (VIP) Career & Technical courses are designed to meet the needs of students who require a smaller learning environment and a slower paced curriculum to be successful. Courses will provide introductory skills in various career and technical areas as preparation for future life and employment skills.

Students who successfully complete a VIP course may be eligible to meet the requirements set forth by the NYS Department of Education for the Career Development and Occupational Studies (CDOS) credential. Required coursework and work based learning hours can be tracked and documented for those students needing it. Interested students or school counselors should contact the school counselor at the Career and Tech Ed Center for more information.

Objectives are:

1. Auto Services – developing the skills needed to service an automobile and exposure to the jobs available in the industry.
2. Automotive Maintenance – the occupational skills needed to maintain and repair everyday needs of the automobile as performed by service centers.
3. Automotive Repair – deals more in depth, encompassing actual mechanical skills and equipment used by automotive mechanics in a working shop.
